

Visioning for Success! ... using probability-based thinking to create your life ...

Athletes and high achievers use visualization all the time. They know that they will not always succeed but they should at least give themselves the best possible chance ... and that is what this book is about ... increasing your probabilities ... The book covers the three types of visualization techniques: painting techniques, stepping into techniques and videotape techniques along with the BIG visions that help create our world. If you remember that success is all about how you feel and that every time you are able to visualize your own success, you create a greater chance that you will be able to achieve it, you'll be well on your way to creating a string of mini successes which I hope will help you always feel at least somewhat if not totally successful in your life. This book is basically the book that was published in 1997. A (very) few notes were added in to update a few things related to my life but the book was designed to help YOU develop your own visions. The nice thing is that a doctor once reviewed the book and noted that it was basic. Life skills that help a person become a doctor could also be called valuable. Although the notes and bibliography at the end are dated, the materials are still available and the concepts are still sound. The original book retailed for \$14.00 so I debated how I should price this. The price of \$3.00 for the eEdition was finally chosen because my original intent was for these materials to be available to students so they got a good start in their lives. If you ever want to sample the concepts tied to your own visions without committing to any purchase, I included the workbook exercises (without the supporting text) at www.downsize-stuff.com/economicmultipliers_93 ... (an attached PDF file) ...
