

The Old Age Challenge to the Biomedical Model: Paradigm Strain and Health Policy (Society and Aging)

Central to this book is the idea that the United States is in the midst of a health care crisis, one that will be exacerbated as the population continues to age. Longino and Murphy trace the philosophical and technological development of the biomedical model and show its inadequacy to deal with the massive chronic disease demand of the present and the future. They argue that the delivery of health care will meet and survive the old age challenge only if the medical system is thoroughly democratized. A more inclusive system must be devised that encourages a more reasonable allocation of resources, gives more attention to prevention, adopts a wider range of non-medical interventions, and invites citizens to become more involved in their own health care and the planning of services.

Marlynns R.

" Undeniably the best chiropractic care I've received to date. So happy to have you as my care team!!! "

Dan L.

" It's been about four months since I started it and I have never felt better. It's really ideal having a pain treatment doctor that knows what he's doing and does it so expertly."

Christina C.

" My car accident took place less than a block from my home. I went to a 1800SOSPain pain center a couple days later.

The treatment, the staff & Dr. Tommy was amazing."
